

STEEL GARAGES UK

BUILDING SOLUTIONS

Welcome to Steel Garages UK

Steel Garages UK Building Solutions supplies and manufactures premium Steel Garages, Garden Offices, Workshops and Garden Sheds throughout the UK.

We provide a wide range of off-the-shelf and bespoke solutions to meet your outdoor space needs and requirements at unbeatable prices.

The fact that we only use the highest quality materials available, combined with our superior customer service makes us the most affordable and the number one supplier of Steel Garages across the UK.

Contact one of our team today for a free consultation on converting your outdoor space with Steel Garages UK.

why choose us?

- >> Our cladding is coated in a PVC which has a 25 year guarantee as standard
- >> High grade, twice the strength steel. We only use high tensile galvanised steel which is double the strength of regular mild steel
- >> The galvanised base used by Steel Sheds UK ensures your building remains dry and damp proof
- >> All buildings have safe edge flashing as standard

If you require a tailor made solution for your outdoor space, our bespoke service allows us to design and manufacture your steel garage, garden office or workshop to your exact specification requirements. All of our steel buildings adhere to the highest quality standards in accordance with British and EU regulations and arrive flat packed, ready for assembly. Alternatively, Steel Garages UK can lay a concrete foundation and install a fully assembled building on-location.

“

Steelgarages UK constructed a purpose built office & training room for me several years ago. I am happy to say that the quality materials and workmanship has meant that, despite the bad weather in recent years and much use, my office is in excellent condition and still looks as good as the day it was built. Thanks, John!

Steel Garages

Steel Garages UK use the highest quality galvanised steel during the manufacture of your steel garage to ensure that you have a quality building which stands the test of time.

Steel garages are available as an insulated garage, double garage, or a single garage.

Here at Steel Garages UK we can custom build a garage to meet any specification which you may so require. Anti condensation roof sheeting gutters and down pipes are supplied as standard. If you would like to customise your steel garage, a range of PVC doors and windows are available. Our steel garages are fitted with GDS rollers as standard, however, industrial roller doors or electric roller doors can be added if required.

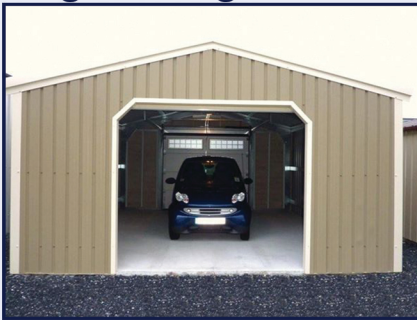

Standard Features

- >> Material: Structural grade galvanised steel frame
- >> 100% more steel than our competitors
- >> Colour matching gutters & downpipes
- >> 12 degree roof pitch
- >> 2.44 meter eaves
- >> Gds roller doors
- >> Dobel (Swedish steel) PVC coated cladding
- >> Safe edge flashings
- >> Anti con roof sheeting

Optional Features

- >> Steel p/a doors
- >> Base frame
- >> PVC double glazed windows

Single Garage

Insulated Garages

Double Garages

Fiber Cement Garages

Stud Frame Garages

Hi Everyone, I recently purchased a a steel shed from Steelgarages UK. I am delighted I chose this company for a few reasons. From the planning stage right through to the erection of the shed the company were a joy to deal with. They were very informative of the types of shed the various materials and were very open to listening to any suggestions that I had. The quality of the material used and standard of workmanship is excellent. I found this company to be totally professional in how they dealt with my queries and in how they carried out their business and the time frame given for the job completion was very accurate. I would strongly recommend Steel Garages UK to anyone who is thinking of erecting a shed or steel garage.

Steel Garages UK dedicated team of highly trained construction worker and steel workers use CAD detailed drawings for easy construction. We are happy to provide structural calculations for building control and planning purposes. Contact us today to discuss your requirements with our highly skilled team.

Standard Features

- >> PVC windows and doors
- >> PVC coated steel
- >> 50 mill king span insulation to interior
- >> 100 mill rock wool insulation for sound insulation
- >> Professional internal plaster finish
- >> Fully wired to you exact specification
- >> Base frame

Optional Extras

- >> PVC shi lap cladding
- >> Attractive tile effect roof
- >> Cedral fiber cement

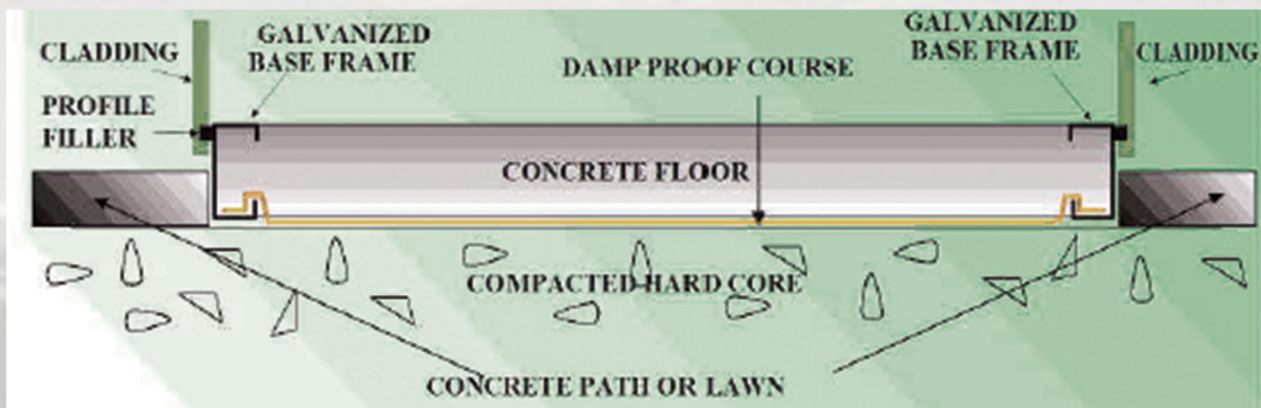

Base Frames

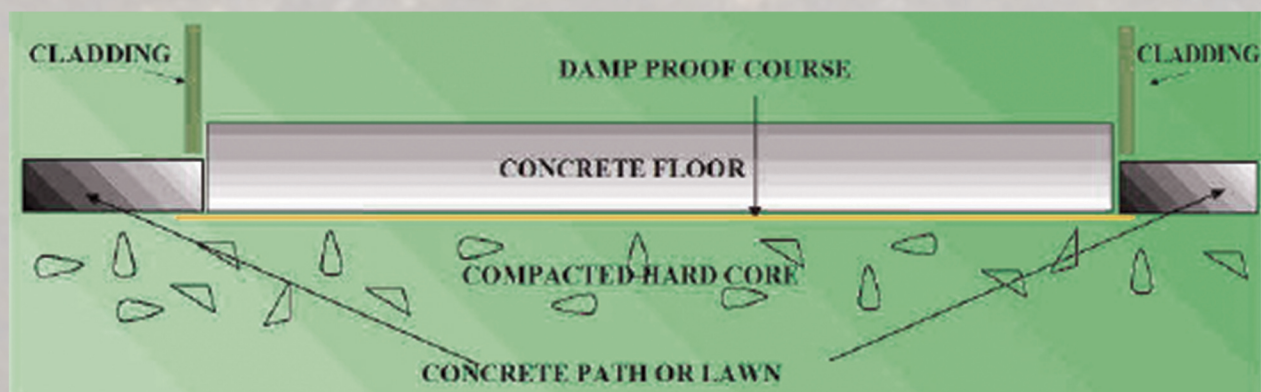

A base frame provides an accurate floor slab shutter (no need for timbers). Sheds constructed on a base frame will have less condensation problems. Wind and snow loads are increased by 25% as the weight is distributed equally to the floor slab through the wall sheeting.

This results in an extremely secure, dry and well anchored building regardless of weather conditions.

The section below shows how a base frame completely eliminates damp from outside sources.

This section below shows a typical building without a base frame. Damp will seep in from the sides as the concrete is exposed to the outside elements.

Garden Sheds

“

I recently purchased a shed from Steelgarages UK. It is a quality steel shed with a roller shutter door. The reason I chose Steelgarages UK was because I was impressed with the strong steel functional cross sectional members which surpassed any other sheds which I viewed before making my selection. The shed was punctually and professionally erected on the day arranged. I was particularly interested in the robust cross section of Steelgarages UK as it was functional in its capacity for insulation and to erect shelving which would carry many heavy items which I store in the shed. The outside of the shed is finished to a very high standard. John, the proprietor, was on site to supervise the erection of the shed and he even gave his own time without charge to erect for me chutes which I had supplied. I would strongly recommend Steelgarages UK to any prospective buyer.

”

- Sean Franklin

Case Study

Insulated Garage

- >> Size 5 meters wide by 11 meters long
- >> Constructed using galvanised frame and 40mill composite panel (kingspan)
- >> Steel base frame was used the only way to stop damp entering the building
- >> Construction of this project took just 2 days to complete

Deliveries

Steelgarages UK deliver throughout the UK in our own trucks. We don't use third party hauliers ensuring all our products are delivered in perfect condition. Delivery is 3 weeks from order date. A £99.00 deposit secures all orders. Full payment must be made prior to dispatch of your steel building. Steel garages offer a full erection service for those who wish to avail of it.
